designPhilosophy

Can a design revolution come from a simple stool? In Africa, the stool has historically served its function as furniture while remaining an important cultural artifact. In African tradition, each stool was considered a part of its owner to the point where some believed that it was actually part of the soul. Now the contemporary furniture world has Berchuma. The series of stools, chairs, and tables are inspired by ancient African furniture and contemporary fine art. The traditional feel is fused with contemporary styling and superior craftsmanship. Experience the beauty of tradition and style through Berchuma – where function meets art!
